

Lineartechnik
MADE IN GERMANY

max® – Partner der Unternehmen

Die produzierende Wirtschaft kennt auf die Vernetzung der Märkte, auf den globalen Wettbewerb, auf die immer rasanteren und größeren Technologiesprünge vor allem eine unternehmerische Antwort: Automation. Dabei ist sie weitgehend von zuliefernden Partnern abhängig. Von ihnen erwartet sie flexible, zuverlässige, wirtschaftliche Systeme auf hohem Qualitätsniveau.

In der max® GmbH findet die Industrie einen Partner, der genau diese Lösungen anbieten kann. Aktuellster technologischer Stand, hohes Verantwortungsbewusstsein für die Investition des Geschäftspartners und enger Kundenbezug gehören bei der max® GmbH zu den obersten Grundsätzen. Zum Dienstleistungsgedanken zählt auch, dass dem Kunden überzeugende – teils patentierte – Produktlösungen innerhalb sehr kurzer Fristen bereit gestellt werden können und zuverlässiger, schneller Service gewährleistet ist.

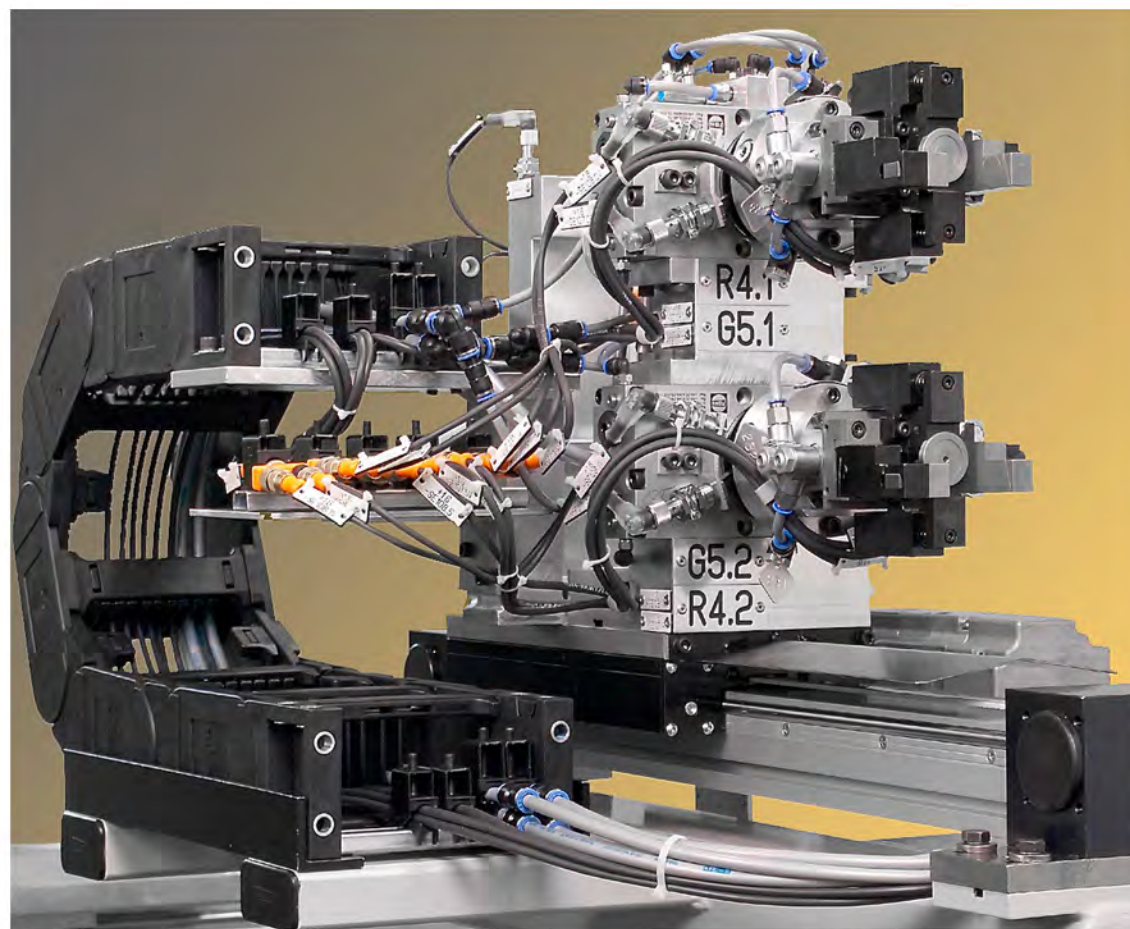

Die folgenden Seiten zeigen Beispiele von umgesetzten Anwendungen aus den verschiedensten Bereichen abgebildet, die Ihnen einen Eindruck von der Vielseitigkeit der max®-Systeme vermitteln.

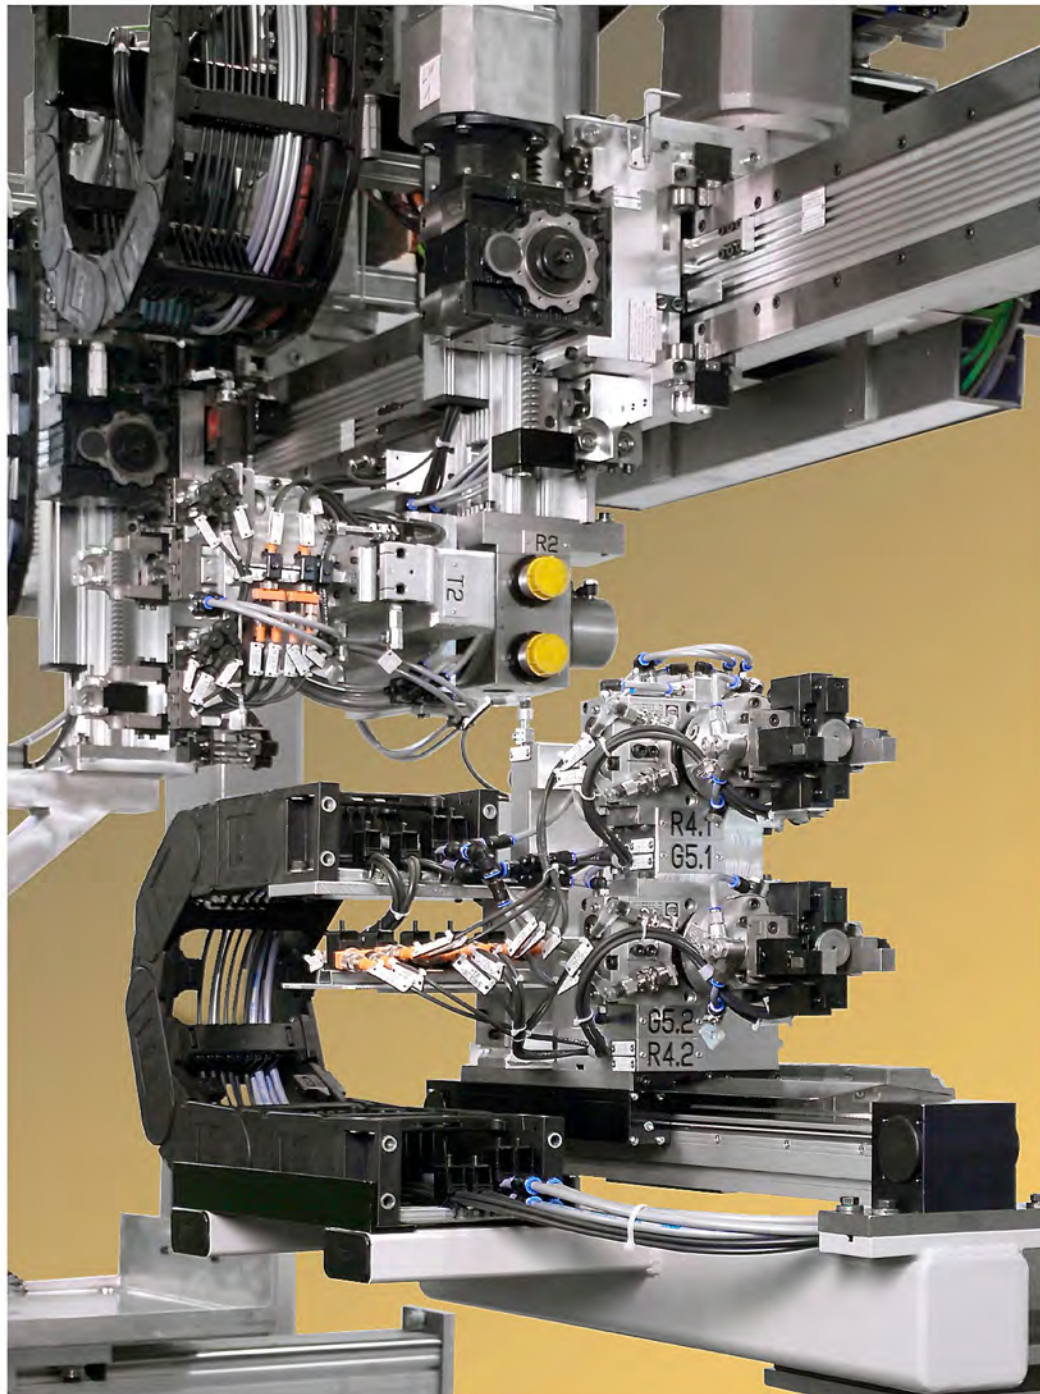

A fundamental key aspect common to all successful manufacturing sectors of today's highly technologically dominated and evolving markets is AUTOMATION.

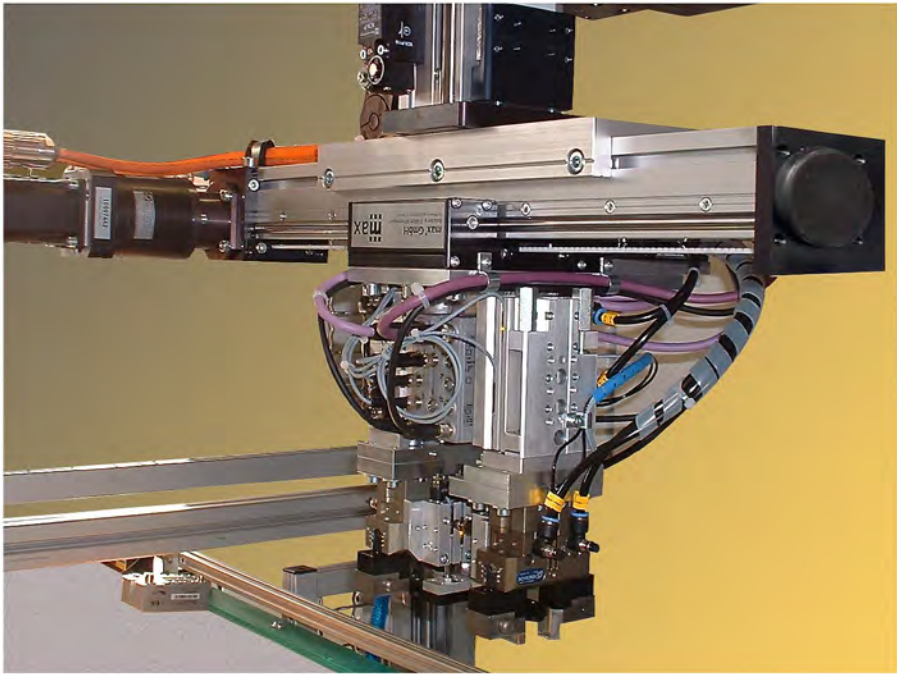

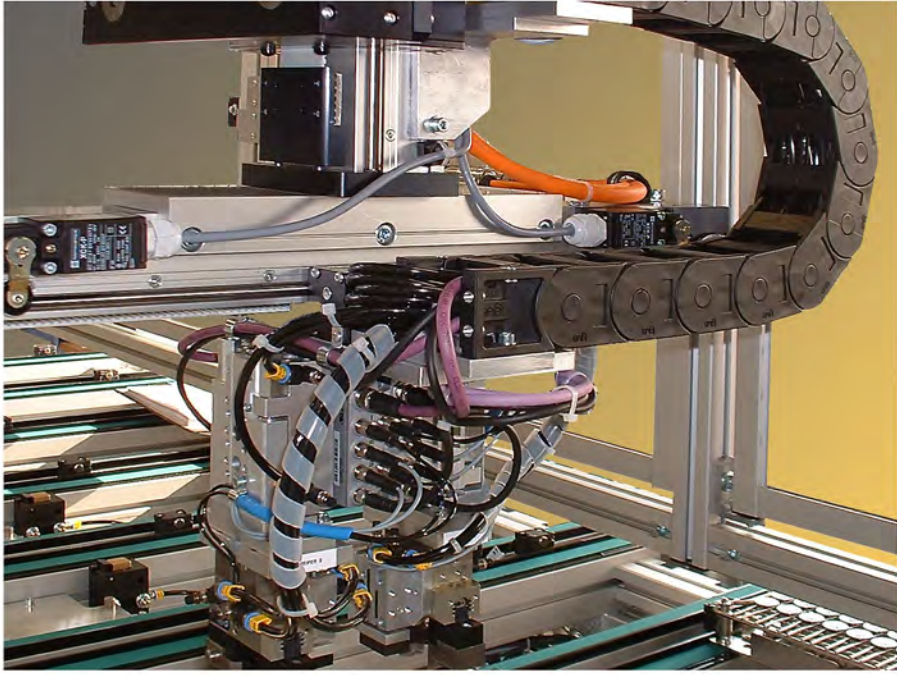

Integration of depend supply partners is a must with focus on economically developed systems of high quality, flexibility and uncompromised reliability.

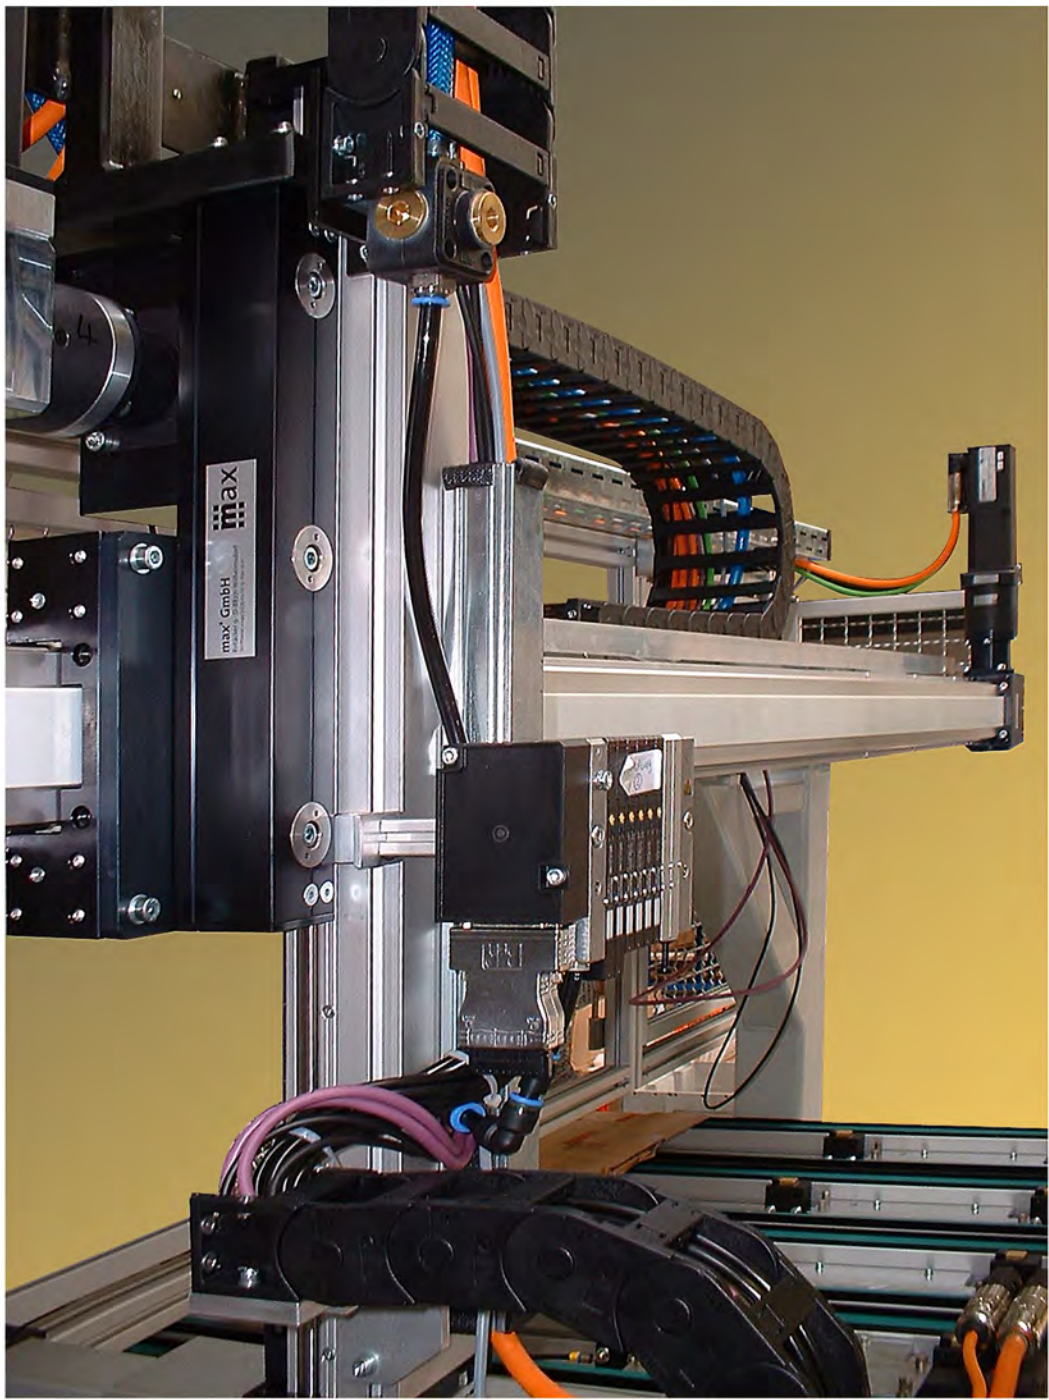

max® GmbH is your preferred partner with solutions custom tailored to specific industrial needs. One of our many objectives is the fulfilment of modern and technologically sound solutions whilst ensuring economical viability and investment compatibility to meet specific customer needs. Production solutions, including patented processes with short turn over times, all of which based on uncompromised service, are guaranteed.

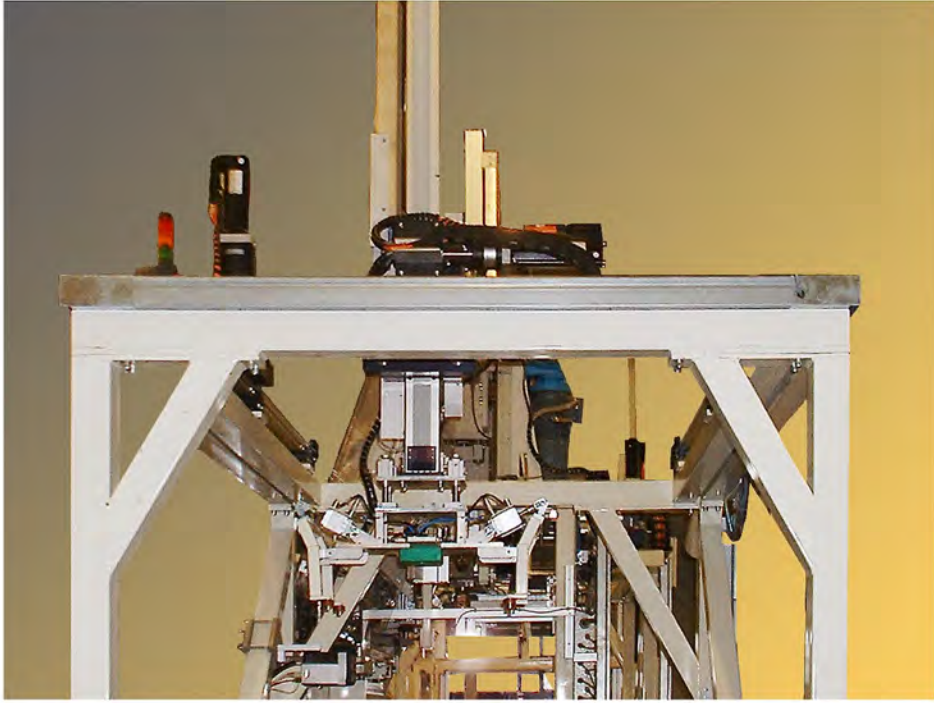

The following pages will show you kinds of system composings and realized applications in different enterprises. They may give you an impression of the variability of max® systems.
